ABOUT ME

Who I am

01

Software Engineer

Fintech Specialist

EU Job Seeker

Team Mentor

"A developer who cares about real impact — not just clean code."

I'm Aoy, a software engineer from Vientiane, Laos. I've spent 3+ years building financial products that real people use every day — from E-wallets to AI-powered bank account opening flows.

I work across the full stack: **Flutter** for mobile, **React.js** for web, **Node.js** & **Python & Java Spring Boot** on the backend. I've shipped to four app stores, integrated payment networks (LaoQR, Visa/Mastercard), and built AI chatbots(Hauwei API) people actually use.

I'm looking to experience in Europe — especially the **Greater Region** around Luxembourg and nearby EU hubs where fintech, banking, and cross-border tech are strong.

— SELECTED WORK

Projects

13+ deliverables – mobile apps, web portals & backend APIs

MMoney X

100k+ users

Laos' leading e-wallet. QR payments, bill pay, tickets, promotions and an in-app AI chatbot — built end-to-end in Flutter.

Flutter Dart Node.js LaoQR

IB Cool

50k+ users

Indochina Bank's mobile app. Full UX/UI overhaul and Online Account Opening with AI eKYC verification.

Flutter AI/OCR Face AI

MMerchant X

Merchant e-wallet for businesses to accept LaoQR payments and track real-time transactions.

Flutter LaoQR Node.js

MyTPlus App

Mobile app for telecom-linked services — mobile packages, IR roaming and wallet features in the MMoney ecosystem.

Flutter Telecom API REST

Online Account & eKYC Portal

AI eKYC

Digital account opening — mobile flow in IB Cool plus web portal for staff review, approve, reject and eKYC document upload.

Flutter React.js Node.js OCR API

DinarPay Portal

Digital banking and loan management platform for Indochina Bank's DinarPay product.

React.js Node.js

MMoney X Management

Web management for MMoney X — backgrounds, icons, promotions and in-app content configuration.

Next.js Vue.js Node.js

LaoQR Payment Gateway

Custom API gateway letting small businesses integrate LaoQR and local banking through a single connection.

Node.js LaoQR LAPNet

MonyChat AI Chatbot

In-app AI assistant powered by DeepSeek with real-time data streaming for live user communication.

Deepseek AI Node.js Streaming

AI eKYC Engine

API layer orchestrating Google OCR, liveness detection and face comparison for bank account verification.

Google OCR Face AI Node.js

App Release Pipeline

CI/CD for Play Store, App Store and Huawei App Gallery — build automation, signing and staged rollouts.

CI/CD Docker GitFlow

Heineken Partner Web

Partner redemption website for Heineken campaigns — customer redeem flows and promotion management.

React.js Node.js Promotions

Credit Card Portal

Web portal for credit card settings, promotions and Visa/Mastercard payment gateway integration in MMoney X.

Vue.js Next.js Node.js Visa Mastercard

Telecom Packages API

Integrated telecom service APIs for buying mobile packages and international roaming (IR) in-app.

Node.js Telecom Integration

10+

AND COUNTING

10+ more modules — Google OCR, liveness & face match, eKYC approve/reject, LaoQR & LAPNet, Visa/Mastercard, DeepSeek chatbot, tickets, bills (electric, water, TV) & more.

— WRITING & THOUGHTS

Blog & Articles

Check if Gemma downloaded it & is correctly ... See full post

Run token count test
Is it needed? How many tokens?

Extend vocab if needed
Add all tokens up to Gemma's vocab

Step 3 — Format dataset as instruction pairs
Convert raw text to prompt-completion JSON format

Example JSON record

```
{
  "instruction": "Write a poem about the beauty of Laos.",
  "input": "The beauty of Laos is...",
  "output": "The beauty of Laos is a land of ancient temples and lush rice terraces, where the mountains are shrouded in mist and the water is crystal clear."
}
```

Step 4 — QLoRA fine-tuning on Colab

AI/ML

Building a Lao Language LLM with Gemma 4: A Complete Guide

How I fine-tuned Google's Gemma 4 E4B model to understand and generate Lao text — covering vocab surgery, continual pre-training, and supervised fine-tuning from scratch.

— GET IN TOUCH

Let's build something good.

I'm actively looking for software engineering roles in Luxembourg, the Greater Region (Belgium, France, Germany), and nearby EU hubs. If you're building something exciting or just want to have a conversation, I'd genuinely love to hear from you.

Currently in Vientiane, Laos
Open to relocation · Remote · Hybrid
